Question #1 *Topic 1*

What solution can be used if users need to centrally control and manage Internet access traffic but do not have the security processing capability?

A. Deploy advanced security capabilities on CPEs.

B. There is no solution.

C. Deploy professional security devices at the headquarters.

D. Connect to third-party security services to centrally control and manage services.

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #2 *Topic 1*

What is the minimum time required to detect spoofed dumb terminals?

A. 1 minute

B. 5 minutes

C. 10 minutes

D. 2 minutes

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #3 *Topic 1*

Which of the following wireless by China?

A. WPA

B. WAPI

C. WAP3

D. WPA2

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #4 *Topic 1*

Which of the following fields in an MPLS label identifies the service priority?

A. TTL

B. BoS

C. EXP

D. Label

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #5 *Topic 1*

In industrial production OT networking, what is the maximum number of hops supported on a ring network?

A. 50

B. 20

C. 30

D. 60

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #6 *Topic 1*

Which of the following AirEngine APs are Wi-Fi 7 APs? (Choose all that apply.)

A. AirEngine 6776I-X6TH

B. AirEngine 8771-XIT

C. AirEngine 6776-57T

D. AirEngine 5773-25HW

Suggested Answer: *A, B, C, D*

Currently there are no comments in this discussion, be the first to comment!

Question #7 *Topic 1*

In the High-Quality 10 Gbps Campus Network Solution, which of the following experiences is improved by iMaster NCE-Campus?

A. O&M experience

B. Wireless experience

C. Application experience

D. Wired experience

Suggested Answer: *A*

Currently there are no comments in this discussion, be the first to comment!

Question #8 *Topic 1*

In the dual-gateway scenario, if each CPE has one WAN link, traffic from the LAN side to a CPE cannot be forwarded through the WAN link of the other CPE.

A. True

B. False

Suggested Answer: *A*

Currently there are no comments in this discussion, be the first to comment!

Question #9 *Topic 1*

Between which of the following SD-WAN components are certificates used for access authentication? (Choose all that apply.)

A. Between RRs and iMaster NCE-Campus

B. Between CPEs and RRs

C. Between CPEs and iMaster NCE-Campus

D. Between CPEs

Suggested Answer: *A, B, C*

Currently there are no comments in this discussion, be the first to comment!

Question #10 *Topic 1*

Which of the following components in Huawei's ESN-free deployment solution generates the SiteCode?

A. Egress gateway

B. Core switch

C. iMaster NCE cloud management platform

D. AP

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #11 *Topic 1*

Which of the following key technologies are used in Huawei's application fault demarcation solution? (Choose all that apply.)

A. iPCA 2.0

B. VIP FastPass

C. Intelligent simulation dialing test

D. iPCA 3.0

Suggested Answer: *A, C, D*

Currently there are no comments in this discussion, be the first to comment!

Question #12 *Topic 1*

Which intelligent traffic steering mode can be used to improve link bandwidth utilization in the case of multiple enterprise links?

A. Bandwidth-based traffic steering

B. Application priority-based traffic steering

C. Load balancing-based traffic steering

D. Link quality-based traffic steering

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #13 *Topic 1*

An AP cannot work independently. Instead, it must be configured by a WAC or iMaster NCE-Campus.

A. True

B. False

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #14 *Topic 1*

Which of the following protocols is a ring network protocol?

A. SNMP

B. EPRS

C. LLDR

D. GVRP

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #15 *Topic 1*

The AR6710-H supports dual main control boards.

A. True

B. False

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #16 *Topic 1*

Global radio calibration adopts a “the more, the better” approach. It needs to be performed immediately if poor wireless experience is detected.

A. True

B. False

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #17 *Topic 1*

Which of the following VLAN networking solutions is recommended when there are 15,000 wireless terminals on the customer network?

A. Core switch + access switch + native WAC + AP

B. Core switch + aggregation switch + access switch + native WAC + AP

C. Core switch + aggregation/access switch + standalone WAC + AP

D. All of the above

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #18 *Topic 1*

Which of the following algorithms is used by WPA3?

A. AES256

B. AES128

C. AES512

D. RC4

Suggested Answer: *A*

Currently there are no comments in this discussion, be the first to comment!

Question #19 *Topic 1*

Which of the following are common concepts on the wireless side? (Choose all that apply.)

A. Channel

B. SSID

C. Carrier

D. Attenuation

Suggested Answer: *A, B, D*

Currently there are no comments in this discussion, be the first to comment!

Question #20 *Topic 1*

Which of the following is not part of an IFIT measurement model?

A. Measurement direction

B. NMS

C. Measurement flow

D. Measurement point

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #21 *Topic 1*

What are the interconnection modes between IWGs and the backbone network in multi-tenant IWG networking? (Choose all that apply.)

A. MPLS Option C

B. MPLS Option B

C. Option A VLAN

D. Option A VXLAN

Suggested Answer: *B, C*

Currently there are no comments in this discussion, be the first to comment!

Question #22 *Topic 1*

Huawei offers an innovative technology to achieve smooth video even at up to 20% traffic packet loss between enterprise branches. What is this technology?

A. FEC

B. iPCA

C. A-FEC

D. IFIT

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #23 *Topic 1*

On a large campus network, inter-WAC roaming must be avoided as much as possible to ensure roaming experience.

A. True

B. False

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #24 *Topic 1*

Which of the following statements is false?

A. Traditional QoS schedules traffic based on interface bandwidth, allowing differentiation of services based on service levels. However, it is difficult to differentiate services based on users. Therefore, traditional QoS is typically applied to the core layer, instead of the access layer.

B. Hierarchical Quality of Service (HQoS) uses queue-based hierarchical scheduling to provide fine-grained quality guarantee for services of different users.

C. Traditional QoS can manage or schedule traffic of multiple services for multiple users simultaneously.

D. Traditional QoS technologies can provide differentiated services to meet requirements of voice, video, and data services.

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #25 *Topic 1*

Which of the following technologies is used to improve air interface security?

A. DTLS

B. WDS

C. PMF

D. IPsec

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #26 *Topic 1*

Which of the following statements are true about SSID planning on a cloud-managed WLAN? (Choose all that apply.)

A. SSIDs can be planned based on different user groups or services.

B. It is recommended that SSID settings take effect on multiple radios (2.4 GHz/5 GHz) at the same time.

C. SSID hiding can be set to improve the confidentiality of SSIDs and prevent them from being sniffed by any terminal.

D. It is recommended to plan as many SSIDs as possible. An SSID can be designed for each fine-grained service.

Suggested Answer: *A, B*

Currently there are no comments in this discussion, be the first to comment!

Question #27 *Topic 1*

What is the maximum number of redundant links supported by a single CPE?

A. 10

B. 8

C. 11

D. 9

Suggested Answer: *D*

Currently there are no comments in this discussion, be the first to comment!

Question #28 *Topic 1*

Which of the following solutions can be used if a customer has multiple campuses that need to have fabric networks deployed and interconnected?

A. Multiple campuses are designed as a single fabric. The core device at the HQ functions as the border node, and the core device at each branch campus works as the edge node to connect to the border node at the HQ through VXLAN.

B. Multiple campuses are designed as multiple fabrics, of which the border nodes are interconnected through IP VRF.

C. Multiple campuses are designed as multiple fabrics, of which the border nodes are interconnected through VXLAN.

D. A single campus is designed as multiple fabrics, of which the border nodes are interconnected through IP VRF.

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #29 *Topic 1*

Which of the following frequency bands can be used by Wi-Fi? (Choose all that apply.)

A. 6 GHz

B. 5 GHz

C. 2.4 GHz

D. 3 GHz

Suggested Answer: *A, B, C*

Currently there are no comments in this discussion, be the first to comment!

Question #30 *Topic 1*

Which of the following extended optional fields are contained in a GRE header? (Choose all that apply.)

A. Version

B. Keepalive

C. Key

D. Checksum

Suggested Answer: *A, C, D*

Currently there are no comments in this discussion, be the first to comment!

Question #31 *Topic 1*

What is the recommended maximum number of APs in a calibration region when cloud APs are deployed on a small or midsize campus network?

A. 1024

B. 128

C. 512

D. 256

Suggested Answer: *B*

Currently there are no comments in this discussion, be the first to comment!

Question #32 *Topic 1*

Which of the following SM series cryptographic algorithms is supported? (Choose all that apply.)

A. SM4

B. SM5

C. SM1

D. SM2

Suggested Answer: *A, C, D*

Currently there are no comments in this discussion, be the first to comment!

Question #33 *Topic 1*

Which of the following traffic steering modes can be implemented through policy-based routing (PBR)? (Choose all that apply.)

A. Based on destination IP address

B. Based on source IP address

C. Based on application

D. Based on protocol type

Suggested Answer: *A, B, D*

Currently there are no comments in this discussion, be the first to comment!

Question #34 *Topic 1*

IPsec uses both symmetric and asymmetric encryption technologies.

A. True

B. False

Suggested Answer: *A*

Currently there are no comments in this discussion, be the first to comment!

Question #35 *Topic 1*

What are the two IPsec data encapsulation modes? (Choose two.)

A. Tunnel mode

B. ESP mode

C. Transport mode

D. AH mode

Suggested Answer: *A, C*

Currently there are no comments in this discussion, be the first to comment!

Question #36 *Topic 1*

How many methods can be used to identify terminals?

A. 5

B. 6

C. 7

D. 8

Suggested Answer: *C*

Currently there are no comments in this discussion, be the first to comment!

Question #37 *Topic 1*

iMaster NCE-Campus can implement refined policy control on user permissions. Which of the following can be used as policy conditions? (Choose all that apply.)

A. User identity

B. Access mode

C. Access location

D. Terminal type

Suggested Answer: *A, B, C, D*

Currently there are no comments in this discussion, be the first to comment!

Question #38 *Topic 1*

On the underlay network of a campus fabric, what is the recommended mask length of the VLAN that interconnects NEs?

A. 30

B. 24

C. 26

D. 28

Suggested Answer: *A*

Currently there are no comments in this discussion, be the first to comment!
