Question #1 *Topic 1*

Which two types of text do you localize by manually updating the translation package? (Choose two.)

A. Phrases with dynamic values

B. Case status values

C. Date and time fields

D. Step instructions in Paragraph Rules

Suggested Answer: *A, D*

Question #2 *Topic 1*

When configuring a table-based Insight, which of the following actions can users perform to customize the data display?

A. Create new data fields for use by the Insight.

B. Modify the underlying database schema to optimize data retrieval performance.

C. Filter, sort, and group the data to display only essential information.

D. Delete records that do not meet specific business criteria.

Suggested Answer: *C*

Question #3 *Topic 1*

A developer is building a complex Decision Table in Dev Studio.

What is the benefit of marking this Rule as a relevant record?

A. It prevents the Decision Table from being modified by other developers.

B. It allows App Studio users to reference the Decision Table in their configurations.

C. It makes the Decision Table available for reporting and analytics dashboards.

D. It improves the performance of the Decision Table at runtime.

Suggested Answer: *B*

Question #4 *Topic 1*

How do you update the urgency of an assignment to increase the likelihood that completion of the assignment occurs before the deadline?

A. Decrease the time alloted on the goal interval.

B. Add an escalation action to the deadline interval.

C. Apply an urgency adjustment to the deadline interval.

D. Apply an urgency adjustment to the goal interval.

Suggested Answer: *C*

Question #5 *Topic 1*

What is a key benefit of Tool Rules in Pega GenAI implementation?

A. They allow agents to operate independently of business policies.

B. They restrict users from interacting with agents based on user roles and responsibilities.

C. They remove the need for human oversight in generative AI systems.

D. They support governance by controlling agent behavior and helping to provide transparency.

Suggested Answer: *D*

Question #6 *Topic 1*

You are a low-code developer that is interested in automatically receiving personalized suggestions throughout application development.

How do you achieve this outcome in Pega Platform?

A. Install a browser plugin.

B. Contact the Pega Support Center.

C. Use Agile Workbench.

D. Enable Pega GenAI features.

Suggested Answer: *D*

Question #7 *Topic 1*

A development team is using Deployment Manager to promote a claims processing application to production. During the deployment process, Deployment Manager detects that three items on the Security Checklist remain incomplete.

What happens if the Security Checklist is incomplete in Deployment Manager?

A. Default security settings are automatically applied to complete the checklist.

B. The application deploys successfully but logs a warning message.

C. The application cannot advance to the production environment.

D. The application deploys but operates with restricted functionality until resolved.

Suggested Answer: *C*

Question #8 *Topic 1*

DRAG DROP

Drag the class type on the left to the matching rule description on the right.

Answer Area

Class type		Rule description
Integration		The rules that describe the data types in the application.
Data		The rules that describe how to process cases.
Work		The rules that describe how the application interacts with other systems.

Suggested Answer:
Data rules describe application data types; Work rules process cases; Integration rules govern interactions with other systems.

Question #9 *Topic 1*

A developer needs to relate a Case Type to a Data Object that stores emergency contact information entered by the user.

Which Field Type is most appropriate?

A. Embedded Data

B. Case Reference

C. Data Reference

D. Text (paragraph)

Suggested Answer: *A*

Question #10 *Topic 1*

What is a Language Pack in the context of localization in Pega Platform?

A. A template for creating an application in a distinct language.

B. A collection of language-specific Rulesets to support localization.

C. A set of international coding standards for application development.

D. A tool for testing application performance in different regions.

Suggested Answer: *B*

Question #11 *Topic 1*

What is the primary purpose of Pega GenAI Knowledge Buddy?

A. To create automated test Cases for Pega applications.

B. To help find and manage information efficiently.

C. To generate code snippets for developers.

D. To connect Pega applications to large language models.

Suggested Answer: *B*

Question #12 *Topic 1*

A developer is designing a new application that will be used across multiple departments.

Which guiding principle of modular enterprise reuse ensures that components can be modified without disrupting entire applications?

A. Updateable

B. Interoperable

C. Configurable

D. Modular

Suggested Answer: *D*

Question #13 *Topic 1*

In an Insurance Claim Case Type, the Assessment Stage includes multiple tasks such as Damage Estimation and Fraud Investigation. Different teams can complete both tasks independently.

Which configuration best improves the overall claim resolution time?

A. Use parallel Processes so each team can work on their respective task simultaneously.

B. Include both tasks in a single Process, but use routing and Service-Level Agreements to ensure task completion.

C. Remove all Processes and use only Steps in the Assessment Stage to support simultaneous work.

D. Create one Process that uses Decision shapes to determine which team performs their task first.

Suggested Answer: *A*

Question #14 *Topic 1*

Which two collaboration tools allow teams to communicate faster and share information more efficiently while resolving cases? (Choose two.)

A. Tags

B. Pulse

C. Widgets

D. Dashboards

Suggested Answer: *A, B*

Question #15 *Topic 1*

Users must provide values to certain fields before submitting a job application form.

Which configuration adds asterisks next to the field labels to indicate the mandatory fields on the form?

A. Configure a disable when condition on the fields.

B. Use a validate rule to verify the fields have a value.

C. Configure the view and set the fields to always require user input.

D. Use an Edit validate rule to verify whether each field has a value.

Suggested Answer: *C*

Question #16 *Topic 1*

How do Pega GenAI Agents enhance user interaction with applications?

A. By helping users to learn complex programming languages during application development.

B. By allowing users to naturally converse to retrieve information and delegate routine actions.

C. By limiting user options to secure, predefined workflows that reduce complexity.

D. By completely replacing the need for separate user interfaces in the application.

Suggested Answer: *B*

Question #17 *Topic 1*

You are designing an application that opens investment accounts. You create a child Case to approve the list of services available only to experienced investors. Once approved the parent Case copies the list of services from the child Case. While testing, you notice that the parent Case does not include the correct list of services that are approved in the child Case.

Which two of the following approaches can you take to resolve this issue? (Choose two.)

A. Turn on data source simulation for the data page.

B. Check the Application tab in the browser developer tool.

C. Add an Edit Validate Rule to compare copied values.

D. Use the Tracer tool in either App Studio or Dev Studio.

Suggested Answer: *A, D*

Question #18 *Topic 1*

Which two scenarios require you to configure conditional processing within a case type? (Choose two.)

A. In an application, customers can enter their member ID. If the ID is valid, the case advances past the Enter customer information process.

B. A shopping application requires customers to enter their shipping address. If it matches their billing information, the information is automatically copied.

C. A customer service application requires customers to select the type of request, so the requests are routed to the appropriate department.

D. A museum ticketing application gives free tickets to students and seniors, so these individuals skip the payment information step.

Suggested Answer: *A, D*

Question #19 *Topic 1*

What is the purpose of the Details View?

A. To display interactive forms for users to enter and update Case data.

B. To enable users to post and respond to messages in the context of a Case.

C. To render read-only Case data, including important fields and other information.

D. To serve as a navigation menu for accessing the entire application.

Suggested Answer: *C*

Question #20 *Topic 1*

Which two features does Pega GenAI Autopilot provide to help developers with data management? (Choose two.)

A. Deleting unused data objects in the application permanently.

B. Migrating data models from legacy systems automatically.

C. Suggesting choices for picklist fields in the Data Model of the Case Type.

D. Generating sample records for a Data Object to make testing easier.

Suggested Answer: *C, D*

Question #21 *Topic 1*

When designing a Case lifecycle in Pega Blueprint, what should a developer ensure for optimal workflow design?

A. Import documentation in the application context to reuse best practices from earlier projects.

B. Create separate Case Types to handle various outcomes and exceptions to the workflow.

C. Reduce relationships between Case Types to maintain independence and reusability.

D. Ensure lifecycle completeness with a logical start, Resolution Stage, and exception paths.

Suggested Answer: *D*

Question #22 *Topic 1*

You need to populate a test page with valid data in order to verify that a Unit Test Rule runs as expected.

Which approach ensures the Unit Test Rule runs correctly?

A. Configure a validate rule to populate the page.

B. Configure an assertion to set values for the test page.

C. Run a data transform to create the test page.

D. Refer data from a new Decision table in the Work- class.

Suggested Answer: *C*

Question #23 *Topic 1*

When creating a new version of a Ruleset in Pega Platform, what happens to the Rules in the previous version?

A. The Rules are archived in a separate database

B. The Rules are moved to the new Ruleset version

C. The Rules are automatically deleted

D. The Rules remain in the previous Ruleset version

Suggested Answer: *D*
